1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 10, 18, 19, 34 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hinds. Hinds discloses the claimed structure including including an electrically powered vessel with a type of propulsion device that is capable of being operated independently and is capable of being installed in a prefabricated manner in different location in the vessel. Being an electric motor the device of Hinds is inherently low emissions.

3. Claims 5, 7, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hinds. Hinds does not disclose shock damping, air-gap windings and water jets. It would have been an obvious choice of engineering design to form the device of Hinds with shock damping, air-gap windings and water jets for improved reliability and improved performance and ease of steering.

4. Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis in the claims for the generators (claims 5 and 7) and the stators (claim 7).

5. Claims 2, 4, 8, 9, 11-17, and 21-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
